

Sathwik Pentakoti

Full Stack Developer (Node.js, React, AI/ML)

+91 62817 92950 | sathwikipentakoti@gmail.com | github.com/sathwik-45 | sathwik-dev.vercel.app

PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, CGPA 8.3) and Full Stack Developer with hands-on experience building React.js front ends and REST API back ends with Node.js and Spring Boot, backed by PostgreSQL, MySQL and MongoDB. Completed a Generative AI internship at Wipro and built AI/ML projects using LLMs (Llama via Ollama), prompt engineering and machine learning models. Available for onsite work in Hyderabad as an immediate joiner.

TECHNICAL SKILLS

Full Stack: Node.js, React.js, JavaScript (ES6+), REST APIs, JWT Authentication, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend/Other: Python, Java, Spring Boot

AI / ML: Generative AI, LLM Integration (Ollama, Llama), Prompt Engineering, AI Agent Workflows, NLP, XGBoost

Databases: MongoDB, PostgreSQL, MySQL, SQL

Tools: Git, GitHub, Docker (basics), Postman, VS Code, Vercel, Render

EXPERIENCE

Generative AI Intern | Wipro, Visakhapatnam (On-site)

Feb 2026 - Apr 2026

- Worked on enterprise Generative AI workflows and prompt engineering for internal automation and AI agent use cases.
- Designed, tested and refined prompts to improve the accuracy, quality and reliability of LLM outputs.

Python Full Stack Intern | HMI Engineering Services, Visakhapatnam

2023

- Developed backend APIs and full-stack features using Python, SQL, HTML, CSS and JavaScript.
- Handled database integration, debugging and validation across the software development lifecycle.

PROJECTS

Budzetly - Full Stack E-Commerce Platform | React.js, Spring Boot, JWT | Live: budzetly.vercel.app

- Built a full-stack web application with a React.js front end and Spring Boot RESTful APIs for product and order management.
- Implemented JWT-based authentication and authorization for secure registration, login and protected API access.
- Developed shopping cart, Cash on Delivery ordering, My Orders history, order dispatch/delivered status updates and image upload.

AI-Powered IT Ticket Prioritization System | Llama, Ollama, BERT, NLP | Live: smart-ticket-priority.vercel.app

- Built an AI agent workflow that classifies and prioritizes IT tickets, integrating a locally hosted Llama model (Ollama) with BERT into a Java/Python backend.
- Applied few-shot prompt engineering with impact/urgency analysis to improve accuracy and reasoning quality of ticket classification.
- Supported single-ticket and bulk CSV processing with AI-generated reasoning, plus real-time database monitoring for urgency prediction.

PureDrop - Online Drinking Water Delivery Platform | Full Stack | Live: puredrop-delivery.vercel.app

- Developed and deployed a full-stack platform that lets customers order drinking water services online.
- Designed separate customer and owner workflows within the same application.

Predictive Decision Support System for SMEs | XGBoost, Prophet, Python

- Built a business analytics platform for sales forecasting, customer churn prediction and inventory prediction.
- Implemented machine learning models using XGBoost and Prophet to generate predictive insights for business decisions.

EDUCATION

B.Tech in Computer Science | JNTUGV University (CGPA: 8.3)

2023 - 2026

Diploma in Computer Science | Govt. Polytechnic, Anakapalli (87%)

2020 - 2023
